

Please, Please, Please... Forget about nun's island (Ile des seours) and take your development plans to rebuild Verdun and brossard. Over there they are crying for what you want to build here. With the money you will make building there, you can make more parcs and plant more trees in here (ile des seours), that is what we are missing.

We having finish to suffer the Champlain rebuild and demolition, point nord construction and highway 15 rebuild and your plans are to make us support 20 years of trucks in the street, more difficulty getting in and out of the island. Your plan is for us to utilize a train that will be full by the moment it arrives to the island with people from the south shore and brossard.

You should take your money and build a Mall in brossard. You will make a LOT there and for long time...
