

Overall Broad Stroke Plan for McGill University Concerning MKUltra Past

To become the standard bearing hub/education facility that exposes and informs all true accounts of Medical/ Military #darklabs, #darkops & #darkarts practices.

To become the first University to change their place names from the cult anti heros we have at present to the more historical and appropriate humanitarian based names reflective of First Nations and victims of MK Ultra.

To move past "ground penetrating radar" immediately and actually dig up the site. Don't waste time and money on preliminary nonsense when the plan is to dig it up anyway.

To work with admins from concerned groups like the Mohawk Mothers and Montreal Experiments Class Action Members in a day by day open communication format on the plans to excavate the unmarked graves.

To pursue every lead to its ultimate end: fact or fiction. To not miss step or overreach actions based on power over politics. To operate in good faith.

Please stand by for a detailed report concerning the foundation that will work concurrently with these plans.
