Dear administration team,

I am writing this report for the TIDAN Project located on 1457 Ottawa Street.

First of all, thank you for informing us the project and asking our opinions about it. I was very appreciated.

Secondly, from the perspective of someone who lives in Grinffintown, especially 1400 Rue Ottawa Street, I DO NOT AGREE for the TIDAN project to be continued. My reasons are the following:

- TIDAN Project plans to build three buildings more than 100 meters. There is no other building in this area that is this tall.
- Ottawa Street is narrow, building such three tall buildings next to an eight-floor condo is bullying the local tenants and buyers. We would have no views, no sunshine, no air to breathe.
- Building these three tall buildings take a long time, we, local buyers and tenants, will suffer from air pollution every single day.
- TIDAN Project will just destroy the cozy vibes in Grinffintown. Ottawa Street, a one-way road, will be busy like Boul. Rene-Levesque, only narrower.

With respect, I do not understand why TIDAN project is proposed in Grinffintown. Taking the perspective of locals, if you were a buyer or a tenant here, do you want to live in the shadow of 100+ meters buildings and have Ottawa Street clogged up every morning? Do you have a choice but to have your windows every single day just because there was too much dust outside?

Please seriously consider my proposal.

Thank you.
