**Re : Expansion of the Montreal General Hospital (MGH)**

---

Madam / Sir,

The Good Shepherd Community Centre a center located in Little Burgundy has been delivering services to its South West and downtown Montreal members since 1966.

We have been following the redevelopment of the McGill University Health Centre (MUHC) and especially the Montreal General Hospital located downtown and where the majority of our members have a direct link with this important hospital.

We are pleased to find out that the Montreal General Hospital will be modernized to continue to offer to residents of Montreal the best health care as it has been doing all along. We also appreciate that it is planned to facilitate pedestrian traffic by creating a public plaza which will permit better access. This is important for the aging population that we are serving. Finally, this hospital will remain downtown wth full emergency services and geriatric medicine.

Regards,

Rose Mary Silletta, manager  
For : Elizabeth Quinn, President
