

Dear Mr. Doray,

Please add my voice to those that oppose building a new school in one of the highest traffic areas on Nun's Island. With the not yet completed development of the southern end of the island, rush-hour traffic has already become greater than the current roads' ability to handle it. Delays of 20 minutes or more are already typical for access to the Bonaventure Highway from the southern end of the island. If you were to add delays caused by parents and school buses dropping off children in the mornings, it would become completely untenable.

Regards, Philip Mongeau
