

Dear consultation,

I had just came across that there a new condo coming in the downtown
Which will again add more noise pollution and traffic.

I am Priyanka Sureka and have one child who is 2 yrs old and we live in Atwater. I really like the place I live because I have two park close to my house so I have options for taking my child for the outdoor activity which is very important for his growth and development.

So I would kindly put my request to you that please I place of a condo we should look for more park and some indoor play area for kids so that they can enjoy through out the year.

Looking forward for a positive response.

Thanking you

Regards,

Priyanka

I believe that the proposed condos project should be a play ground because

- 1- down town area needs more play ground for the kids in the neighborhood
- 2- As a mother, seeing how my daughter benefited and enjoyed and loved playing in playground areas, would love that every new mother would feel the same for her child.
- 3- there are enough condos under construction at rene levesque so I believe it ll give balance to the area, the tenants living in those condos would prefer seeing a playground with full energy kids rather than another building blocking the view.
- 4- the more the kids can play outdoor the better for the development of the child, the contact with the nature , the fresh air especially that all winter activities are indoor !
- 5- I know that playground is not profitable as condos but u can't compare raising up souls versus making money out of condos!

Thank u

Aya and Hana

Being a mother living in downtown with no car, the thing I need the most is a place for my son who is just started walking to run around and play at other than the mall. Please make use of this land. The downtown is no shortage of buildings. WE NEED PARKS. We need some nature.

Mai
