International Award Winning Pedestrian Nature Bridge

Green over pass Bridge

We envision that the cyclist and pedestrian Dalle Park bridge to be recognized as the world's leading green over-pass by an exceptional innovative design

Green over pass Bridge

Such a monumental bridge and all its surrounding gardens would be another ideal tourist attraction and a pride of the cities multicultural communities.

Environmentally Self Sufficient

The Bridge ought to be designed with the latest environmentally self sufficient technologies including plants for over pass and the surroundings to neutralizes the Turcot car emissions, solar panels to supplement the bridge's electricity requirement, and many other modern features.

Environmentally Self Sufficient

Possible Facilities/Entertainments

- ▶ Visitor Daycare to provide parents the peace of mind to stay on the bridge and the park and enjoy and relax without worrying about kids
- ▶ Reference Library /lab/ nature learning center
- ▶ Snowshoeing Ice skating
- ▶ Tourism and economic possibilities

Tehran's Nature Bridge

Please look up the design the use of the “Nature Bridge” in Tehran that has attracted thousands of visitors daily, and the garden designs that have been used in that region for more than 1000 years.

Three level pedestrians bridge: a place to eat, pass through and hang out

Persian Gardens: A Symbol of Paradise

- ▶ Water is the central element
- ▶ Humble water fountains and sound of stream provide quit and relaxing yet refreshing environment
- ▶ Gazebo to entertain, study or relax
- ▶ <https://www.youtube.com/watch?v=ZeDZYdosmOk>

The industrial zone: A threat to the St. Jacques's escarpment

Public consultation 2012: Change the zoning from industrial and heavy commercial to residential and light commercial

Suggestions:

- ▶ We suggest that the width of the bridge be wide enough for the pedestrians and cyclist to mingle safely and comfortably.
- ▶ It is suggested that a monument representing the multiculturalism of Montreal be erected at the entrance of the bridge.
- ▶ It is feasible to designate a proper name for the bridge instead of the Dalle Park.

Suggestions:

- ▶ The green space around both sides of the bridge should be turned to gardens with various shapes and plantations representing a “ Visual Art “ of the indigenous people, the Italians, Greeks, Chinese, Persians and many other communities living in this great city and Province.
- ▶ Community gardens are informal gathering spaces, where people develop friendship, learn to share and help each other, & exchange ideas. These garden could be built vertically, horizontally as well as be a great cover for the bridge users during the rainy seasons.
